PROFESSIONAL SUMMARY

Software Engineer and Full Stack Developer with 2+ years of experience building RESTful APIs with Python (FastAPI) and Laravel (PHP), and web interfaces with React.js and Next.js. Strong in PostgreSQL and MySQL database design, JWT and cookie-based authentication, and Docker deployments on Linux VPS servers with Nginx. Delivered healthcare and inventory systems, including a metadata-driven low-code platform and a WhatsApp appointment chatbot with Razorpay payments.

TECHNICAL SKILLS

Languages: Python, Java, PHP, JavaScript, SQL, C

Backend: FastAPI, Laravel, RESTful APIs, REST API Development, Webhooks, Third-party API Integration

Frontend: React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap

Databases: PostgreSQL, MySQL, SQLAlchemy (ORM), SQL Query Optimization, Schema Design, Alembic Migrations

DevOps and Deployment: Docker, Linux (VPS), Nginx, Git, GitHub, Release Management

Authentication and Security: JWT, Bearer Token Authentication, Cookie-based Sessions, RBAC

Automation and Integrations: n8n, Meta WhatsApp Webhooks, WhatsApp Business API, Razorpay

WORK EXPERIENCE

Software Engineer

Sep 2024 – Present

Selten Technologies | Karaikudi, Tamil Nadu | Full-time, On-site

- Contributed to 15+ full-stack applications and developed 50+ RESTful APIs using Laravel and FastAPI.
- Built and maintained 10+ HMS modules including Appointment, Patient, OPD, Clinical Notes, and Prescription workflows.
- Developed and maintained scalable RESTful APIs in Python (FastAPI), after moving the primary backend from Laravel (PHP) to FastAPI.
- Built React.js and Next.js interfaces integrated with backend APIs, delivering features end to end for healthcare and inventory clients.
- Customized CRM modules and integrated WhatsApp Business API for automated client notifications triggered by CRM workflow events.
- Wrote optimized SQL queries and managed schema migrations across PostgreSQL and MySQL.
- Implemented JWT, bearer token and cookie-based authentication with role-based access control, and integrated third-party services such as Razorpay and Meta WhatsApp webhooks.
- Deployed and managed production applications on Linux VPS servers using Docker and Nginx, and provided ongoing production support across the full delivery cycle, from system design to testing and deployment.

Java Developer Intern

May 2024 – Sep 2024

Besant Technologies OMR | Remote | Internship

- Completed the Java Developer Training program and received a completion certificate.

PROJECTS

Sarvam ENT, Hospital Management System

Next.js, Python FastAPI, PostgreSQL, n8n, Meta WhatsApp Webhooks, Razorpay, JSON configuration

- Built a dynamic module builder that lets users create modules and fields at runtime with no code changes, driven by metadata and JSON configuration stored in the database.
- Implemented configurable one-to-one, one-to-many and many-to-many relationships, and generic CRUD APIs with dynamic filtering based on module metadata.
- Developed a consultation workflow with visit state transitions and auto-generated PDF reports.
- Designed a WhatsApp appointment chatbot with n8n and Meta webhooks (patient lookup, doctor selection, slot booking) with Razorpay online payment, payment links and automated notifications.

Mahi Diagnostics, Hospital Management System

React.js, Python FastAPI, PostgreSQL, REST APIs

- Developed patient registration, appointment scheduling and billing modules.
- Implemented RBAC authentication and cron jobs for report generation, appointment reminders and data synchronization.
- Built an MSSQL-to-PostgreSQL pipeline for live data migration and synchronization.

CRM Platform with WhatsApp Notifications

React.js, Redux, Laravel, MySQL, REST APIs, WhatsApp Business APIs

- Customized CRM modules to align with client business logic and integrated external data sources.
- Implemented WhatsApp Business API for automated real-time notifications triggered by CRM workflow events.
- Built custom CRM dashboards and reporting views for business teams.

A Square Design Studio, Inventory Management System

React.js, Redux, Laravel, MySQL, Tailwind CSS, REST APIs

- Built an inventory system with real-time stock updates and a responsive UI.
- Designed an optimized MySQL schema for product catalogues, stock movements and suppliers.
- Developed reporting with exports, stock history tracking and an analytics dashboard.

Internal Task Management System (Jira-like)

React.js, Python FastAPI, PostgreSQL, REST APIs

- Architected and delivered a full-featured task platform adopted by 20+ employees with task boards, dashboards, and sprint tracking.
- Implemented RBAC-based access control and workflow tracking across teams.
- Deployed on a Linux VPS using Docker and Nginx.

EDUCATION

B.Sc. Physics

2020 – 2023

Raja Doraisingham Government Arts College, Sivaganga, Tamil Nadu, India

CERTIFICATIONS

- Java Developer Training, Besant Technologies OMR (2024)

LANGUAGES

Tamil (Native), English (Professional Working Proficiency)
